Jun 2008, The Netherlands

Style & Design proudly presents the Job script.

The Job script is a web product for running powerful and customized job portals. The product may be used also to empower existing websites with jobs portal functionality. Jobs Portal comes with a front site (fully customizable and template based), jobseekers administration space (with functionality for the users to edit their profile, consult the job offers, manage their resume etc.), employers administration space (allowing the employers to post job ads, manage their company profile, search the database with the jobseekers resumes and many others) and powerful back office for the administrators (providing full control over the website, structure and content management, detailed user management, search engines reports, statistics and many others).

With the advanced job features for both employer as jobseeker, SEO Tools (Ping, SEF etc.) and also the extra security tools, which keeps you save for hack attempts.

This software needs PHP 4.0 or higher and a MySQL. database,
Single domain license EUR 1199,00*
Multiple domain license 5 -10 EUR 1099,00
Multiple domain license 10 or more EUR 999,99
*excl. VAT

Make use of our custom made features like;

- Advanced Finance Administrations (send invoices)
- Extended Profile (share video and stream it on our powerfull servers)
- Link administration (get a head start and get your website link addedto over 20 websites)
- Openads integration
- Forum integration (Synchronise users with your community database)
- Community Integration (Synchronise users with your community database)

Features

1. Statistics for the employer (employer can see how many times his ad has been consulted, as well as more detailed report including the date, ip, username of the user consulted the ad)
2. **Ideal** (for **Dutch** Customers) PayPal, 2checkout, cheques and bank wire transfers supported for accepting payments by the employers for posting job ads
3. ZIP based search functionality (for searching for jobs located not far as selected distance from the jobseeker ZIP)
4. **Statistics** for the jobseeker (in order to see how many times his profile has been consulted)
5. Many new features for the administrators, with integrated

GOOGLE MAPS

6. Employers can upload their **logo** (visible on their ads)
7. Jobseekers can add a **photo** to their profile
8. **Improved jobseeker profile**, added date of birth, job preferences, nationality and other fields
9. "**Send to a friend**" functionality for the job offers
10. **Simple/Advanced search**
11. Better control for the administrator over the **ads expiration**
12. Employers see their expired ads on a special page , they can choose to renew them (if they do so, they are charged for this in a similar way as when posting a new ad - one credit from their package)
13. **Featured jobs** (administrator can select featured job which are shown then on the home page)
14. **Newsletter**, Photo Albums, Links management functionalities
15. Improved news functionality
